

Kingfield Road Transport Assessment

Project Description Sheet

Location

Orrell Park, Liverpool

Client

DUNA Ltd

Commenced

May 2001

Key Project Elements

Transport Assessment:

- Existing traffic conditions
- Trip attraction
- Traffic impact
- Accessibility by non-car modes
- Liaison with Local Authority

The client proposed the relocation of sports pitches off Kingfield Road onto an adjacent former school site, to allow the construction of approximately 74 residential units. Our brief was to consider the transport issues associated with the development and to assist in the planning application submission.

Whilst the focus of the assessment was the residential aspect of the development, consideration was also given to the relocation of the sports pitches.

The impact of the development on the local highway network and the accessibility of the site for residents wishing to use public transport were considered.

The TA demonstrated that the proposal's to redevelop the former St Augustine's school and Kingfield Road sports pitch sites could be adequately accommodated by the existing highway network in terms of capacity and road safety.
