

# Quiet Lanes Slaidburn and Chipping Areas

## Project Description Sheet

### Location

Slaidburn and Chipping Areas

### Client

Lancashire County Council

### Completed

February 2003

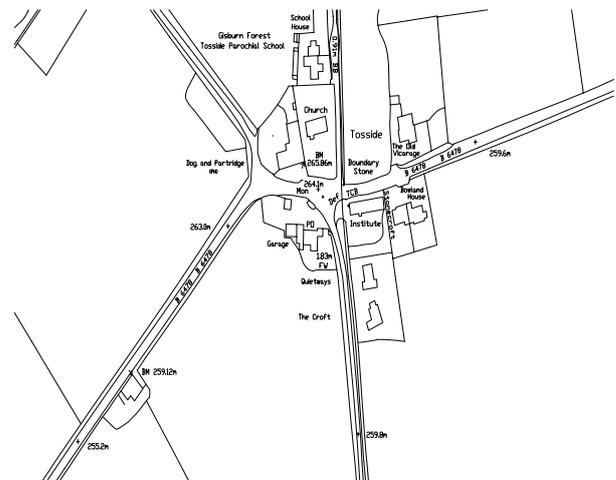

### Key Project Elements

Strategy for the Implementation of 'Quiet Lanes' areas within the Chipping and Slaidburn areas.

Lancashire County Council have chosen two trial areas within Lancashire to promote a quiet lanes system. These areas are Chipping and Slaidburn.

PSA Design provided the strategy for implementing the quiet lanes areas; recording and photographing all of the road traffic and public right of way signs within each area. We then nominated the quiet routes and advised on re-routing traffic using signs to avoid the quiet lanes and cycle routes where possible.

The two areas designated by LCC contained around 200 junctions. The scheme has now been implemented.
